

## **Tax Roll Files**

### Custom Reports & Services

MMTinfo can provide Tax Roll Data File information in ASCII file formats (data files only - no software) for specific customer use. Normally as part of this service, we are called upon to convert the Tax Roll data files from the "raw" data provided by County Property Appraisers into a more usable /understandable format.

This information is most frequently provided to Association of Realtor organization for inclusion in Multiple Listing Service (MLS) products/programs. This type of data has also been provided to government agencies for research purposes.

These data files can be ordered and purchased on a case by case basis or we can produce and deliver them on a regular schedule (monthly, quarterly or annually).

Contact us by phone (850) 474-1398 to find out more or to order the Tax Roll Files.
